

Worried about Getting dental implant?

**With 3D guided implant surgery,  
There's no worries.**

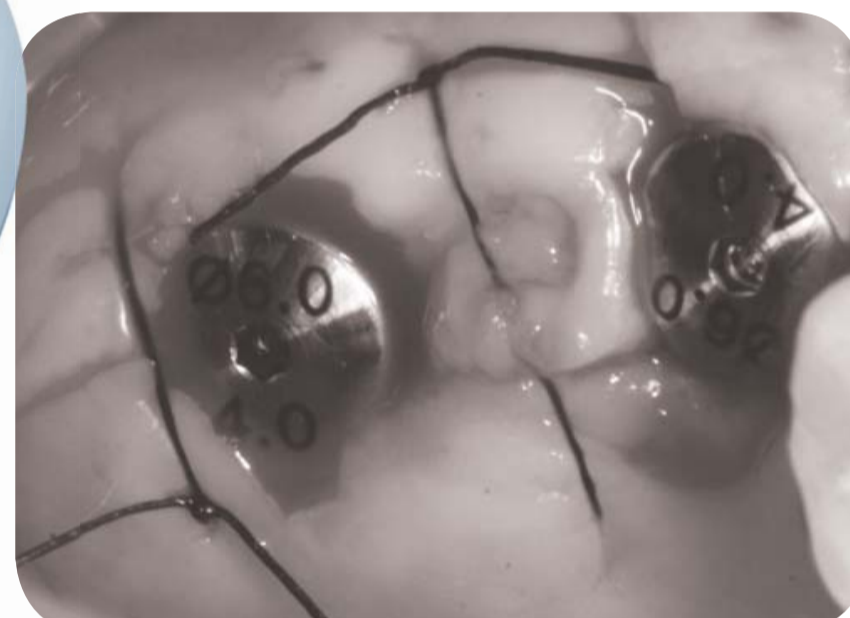

**COMFORTABLE AND SAFE  
FASTER, EASIER SURGERY AND HEALING**

# 3D GUIDED IMPLANT SURGERY

## COMFORTABLE AND SAFE

3D DIGITAL IMPLANT is a flapless surgery with less bleeding and less pain. 3D Guided surgery is more precise and comfortable surgery for patient and doctor.

Conventional flap Surgery

3D digital implant surgery

## FASTER

3D Digital Implant Surgery is completed in about 10 minutes compared to conventional surgery which takes about 50 minutes (1~2 implant placement). Healing time is also faster than convention method.

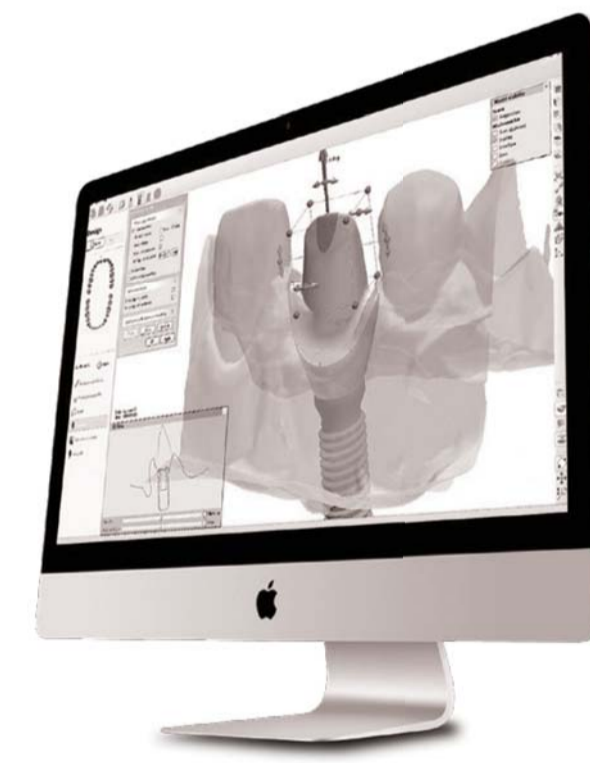

Longer surgery, Longer discomfort

Faster Surgery, Faster Healing

## COMPUTERIZED PRECISE SURGERY

Reduce surgery and healing time with computer simulation surgery prior to operation

1 CT SCAN and take an impression

2 Computer 3D design

3 Implant surgery with 3D Sugical stent
